

THE SIDETOOL SIDEGRADER

Complete Twice the Amount in Half the Time!

THE PROBLEM

Conventional Methods of grading sidewalks include lots of labor, rakes & shovels

THE SOLUTION

SideGrader placed below swivel of an excavator turns it into a multi-tool, freeing the bucket

- #1 System in the world for efficiently producing highly accurate finish grade
- Tools placed below the swivel free the bucket and allow for 360° visibility
- Complete 2-3,000 Lft a day at 20 cents a sq.ft
- Quickly remove obstacles and manipulate material
- Save \$3,000 a day on labor & time, allowing for significantly higher profits!

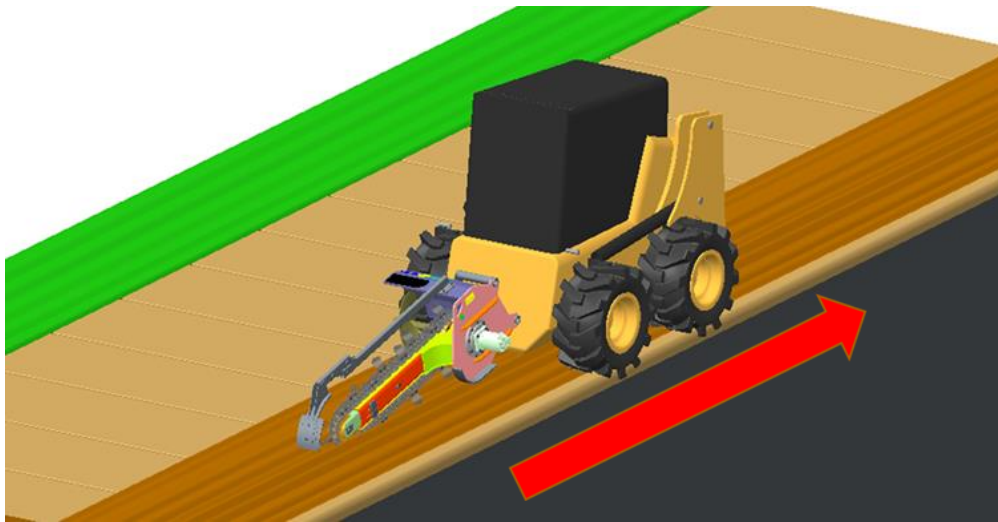

THE SIDETOOL SIDETRENCHER

Now Trench FORWARD & From the Road Surface

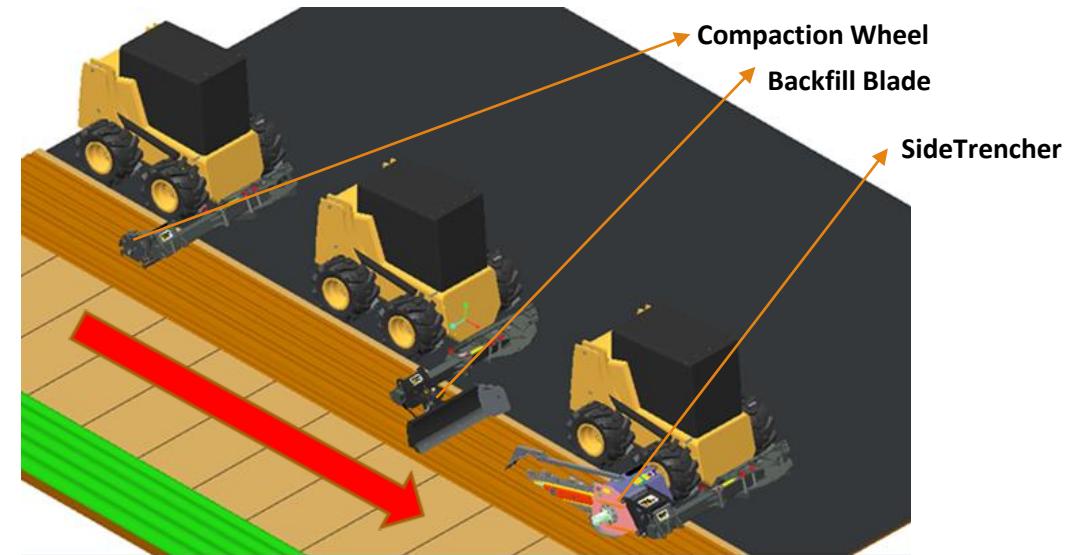

THE PROBLEM

- ❑ Trenching backwards = poor visibility
- ❑ Trenching backwards = machine on top of the grade, often unstable and dangerous
- ❑ Trenching backwards = inability to trench next to fences, foundations or bodies of water

THE SOLUTION

- ❑ Trenching forward from the side = full visibility & increased safety, productivity & versatility
- ❑ Trenching forward from the side = machine next to the grade, not on top of it
- ❑ Trench almost anywhere & backfill & compact also – attachments snap on & off quickly

THE SIDETOOL SILT FENCE INSTALLER

Free the Bucket and Remove Obstacles While Installing!

THE PROBLEM

- Poor visibility
- Obstacles halt labor force
- Incapable of loosening hard material
- Extremely time consuming & expensive

THE SOLUTION

- Freed bucket to remove obstacles
- 360 degree visibility
- 1-2 laborers only, instead of 5 or 6
- Increased efficiency= increased profitability!
- #1 Solution for Landscape Contractors!
